

A PLACE TO CALL HOME

After previously experiencing being unhoused, we are now experiencing happiness with family.

The family was unhoused and struggling. The Home Visitor helped get the family connected to services, worked on getting the family housed, guided mom with her resume, and got some essentials for them.

The Home Visitor shared the Parents As Teachers curriculum to ensure Mom had support and knowledge on child development, parent and child interaction activities, and well-being. They were able to locate housing and mom obtained a position in security. Dad worked extra hours and took care of their son when Mom was working.

The support the family received allowed mom to start up her own small business and she is excited to be in this new journey and grow as a businesswoman.
