ICAN California Hospital Network

To

Address the Spectrum of Child Abuse and Neglect from Risk Factors to Severe Nonfatal/Fatal Child Injuries

ICAN California Hospital Network to Address the Spectrum of Child Abuse and Neglect from Risk Factors to Severe Nonfatal/Fatal Child Injuries

The Inter-Agency Council on Child Abuse and Neglect is helping California Hospitals build a peer support system and tools that will better detect, evaluate, report and manage child abuse/neglect.

System components include:

- **Hospital Directory** to allow for peer support and resource sharing
- **Multidisciplinary/Multiagency Hospital Based Teams** for support cross discipline coordination and coordination and contact with local agencies.
- **External State Data from Hospital Discharge Data** with ICD9CM codes. This provides evaluation of ICD child abuse codes and specific injury data by the age of child to rank hospitals by size. This will include cross hospital data such as child abuse reports made by small hospitals referring cases to large hospitals for specialized medical care.
- **Internal Hospital Data collection and analysis** of medical records and child abuse report records. Internal data for large hospitals will include collection of child abuse reports already made with medical referral.
- **Common data elements** will allow hospitals to share resources, program models and where possible common: language, standards, and guidelines.
- **Special networks** will allow connections between special medical units including: pediatric intensive care, burns and birth services.
- **Computer automation** is a major new component with new computer programs build for the project.

This work is based on previous experience with Child Death Review that now includes more than 1,000 teams in multiple countries. Additional experience includes previous similar hospital experience with LA County and previous/current work with newborn reported at risk. This project began with a state grant to write guidelines for nonfatal severe child injury and continues with private funds..

The ICAN Directory is posted/updated on the web at www.ican4kids.org

The directory includes:

- **Hospitals listed by name**
- **Additional lists note hospitals by county and special medical services**
- **Graphs to rank hospitals by number of injured children under age 3**
- **Maps of the statewide network**

Hospitals are organized alphabetically by name. The appendixes at the back of the document include charts that list hospitals (as well as their corresponding page number) by name, county and special programs. The appendix also includes miscellaneous charts and maps.
